## ▶ About Digijupiter

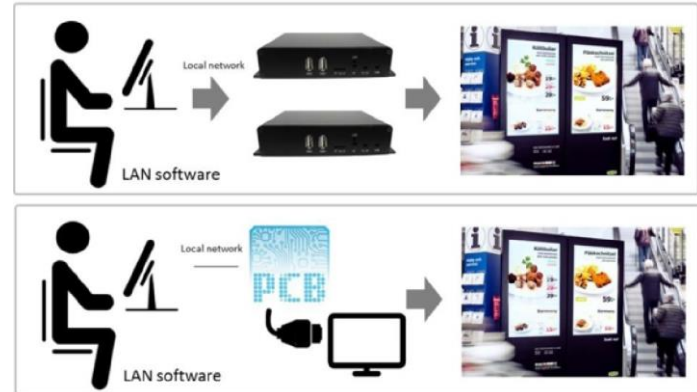

In the past two decades, along with a personal portable computer ,Internet, digital imaging technology, the development of panel touch technology, science and technology set off one after another in a new revolution. At the same time, relying on the internet and tablet touch technology as a platform for audio-visual entertainment products , handheld mobile products , such as medial player box, tablet PC and so on also has been an unprecedented development. Touch technology's industry applications, cloud computing, the internet intelligence products and 3D audio-visual products will be the new development highlights in the next five years.

DigiJupiter is the leading developer of high-quality, consumer electronics products. R&D and manufacturing are located in Taiwan and China. With over 10 years relevant industry experience and knowledge, our exceptional team is driven by our innovative approach to continually develop and bring to you new products and integrations that will add excitement and a new dimension to life. Our main products are digital signage and commercial audio and video player products. The company actively toward to multimedia products, digital consumer products, internet smart products, cloud computing and 3D audio-visual products. We uphold integrity, professionalism , teamwork, corporate culture , we have a number of staffs who pursuit excellence and innovation, with all kinds of expertise of OEM/ODM professional management skills , for further research and development of new products and many customers' technical support and after-sales services, we can provide a strong guarantee and make the company's products has always been among the forefront of similar products as its excellent performance and stable quality.

## ▶ LAN Solution DigitalSignage

For a small scale deployment, it is advised to use Digi-Jupiter LAN software to compile programs. Programs can be distributed to Digital signage(Player&PCB) via the network or a USB disk. This is especially suitable for such occasions as meeting notifications.

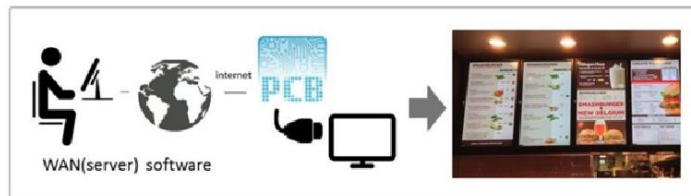

- LAN Software layout demo video click here at: <https://www.digijupiter.com/solution-lan.html>

## ▶ WAN(Server) Digital Signage

For the widespread project, it is advised to use Digi-Jupiter WAN(server) software to compile programs and distribute contents to thousands players(PBC) via the network or a USB disk. User can allot players(PCB) to different kind of groups and send different contents to those groups individually through internet from our server software.

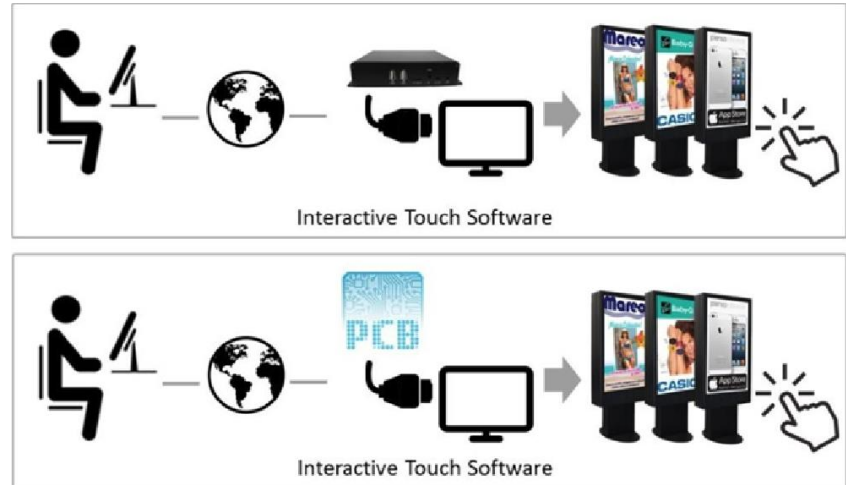

- Network server software demo video click <https://www.digijupiter.com/solution-wan.html>

## ► Interactive Touch Solution DigitalSignage

DigiJupiter Interactive Touch Solution is able to run with our player/PCB board and tablet. User is able to create own touch content for interactive usage. Touch content can be distributed to terminal player(PCB) by internet or USB disk. This solution is good for cinema, shopping mall, restaurant and to replace information table.

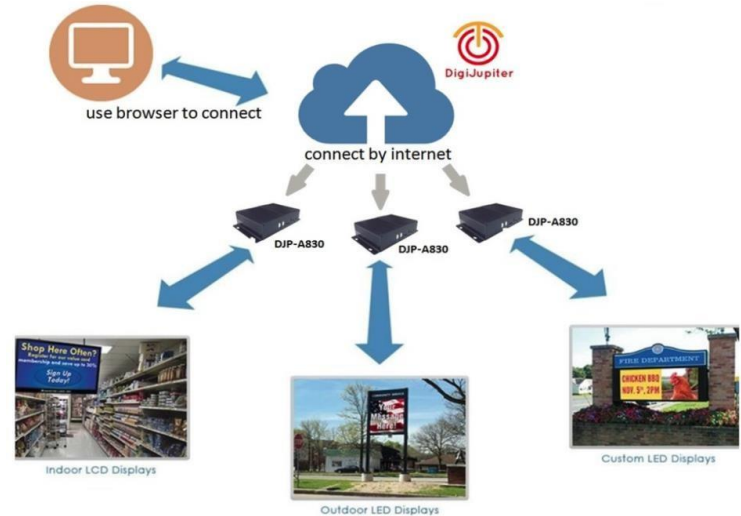

- Interactive touch demo video click <https://www.digijupiter.com/solution-touch.html>

## ► Cloud Solution DigitalSignage

DigiJupiter cloud solution support multi-languages and it is able to edit and update content to thousand digital signage players(PCB) by internet from our cloud. By using our cloud space, user does not need to spend extra costs and time to set up server

- Cloud signage solution demo video click <https://www.digijupiter.com/solution-cloud.html>

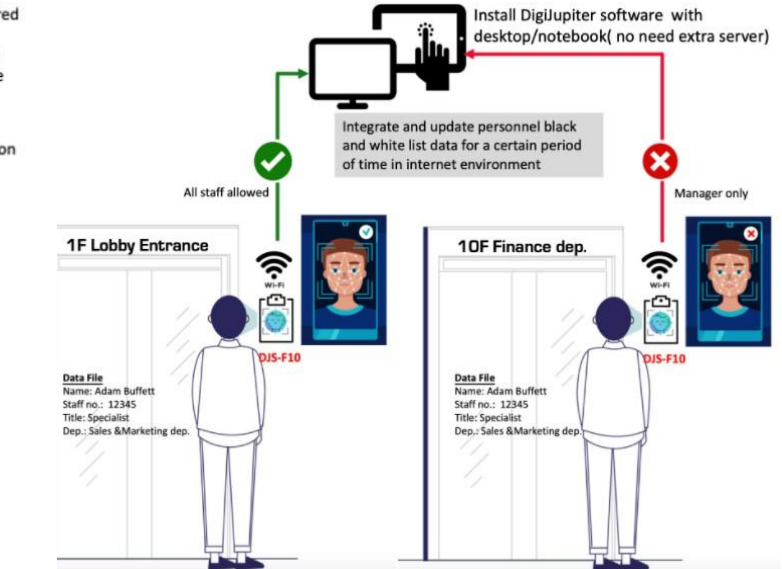

# Face Recognition Solution

DigiJupiter face recognition solution uses professional infrared modules and top face recognition algorithms, with strong face recognition performance, fast recognition speed, ultra-long distance, high temperature measurement accuracy, non-contact, supports for mask recognition and other advantages.

It supports 1: 1 and 1: N face comparison and search, supports reminders of not wearing a mask and abnormal body temperature, which can achieve true non-sense passage under high flow.

## Video Wall Screens

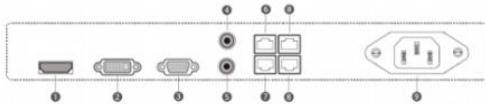

Seamlessly brilliant video walls.

Extremely Thin Bezels for Virtually Seamless Video Walls Deliver deeper visual impact with extreme narrow bezel video walls from DigiJupiter. Featuring a bezel-to-bezel width of just 3.5mm, these 46", 49" and 55" displays will create a virtually seamless picture across multiple screens, forin credible impact. Factory calibration ensures consistent, natural color, while non-glare glass makes sure bright reflections don't get in the way of your beautiful message.

### Connectivity

- 1. HD IN
- 2. DVI-D
- 3. VGA
- 4. CVBS OUT
- 5. CVBS IN
- 6. ISP/IR
- 7. RS232 IN
- 8. RS232 OUT
- 9. AC Power IN
